+ SUMMARY

Hello! I'm a creative, detail-oriented UI/UX designer and web developer passionate about crafting meaningful, user-centered digital experiences. My area of expertise is creating responsive, accessible websites that balance usability and visual attractiveness perfectly. I am very interested in keeping up with the latest design tools and trends. I know frontend technologies like HTML, CSS, and JavaScript. I am particularly interested in the performance, so I add a layer of narrative to my designs and interaction, too. I am committed to creating and developing projects joining modern design with functionality. I am excited about realizing powerful digital experiences.
